Now convert to new BPW shock absorbers.
Improved driving comfort, a smoother ride for the payload
and weight saving.

The further technical development of tried-and-tested BPW shock absorbers has delivered additional benefits:

- Very good damping properties because of optimised characteristics and improved response
- Optimised installation space because of a protective tube with a reduced diameter from 82mm to 75mm (lower tube 72 mm to 65 mm)
 - Weight reduction by about 1 kg (per axle)
- Identical installation and connection dimensions compared to previous version guarantee 100% exchangeability

BPW · THE QUALITY FACTOR

New BPW shock absorbers

BPW "old"	BPW "new"
02.3722.14.00	02.3722.83.00
02.3722.52.00	02.3722.83.00
02.3702.92.00	02.3722.88.00
02.3702.70.00	02.3722.89.00

- Note that the units on each axle must be replaced as a set (2 identical dampers per axle)
- However, it is permitted to have different units on individual axles within the vehicle.
- The familiar "old" variants will be phased out and all will be replaced by the new variants
- This means there will be fewer variants, easier warehouse logistics and identification
