WE THINK TRANSPORT Benefits

The strong depreciation and volatility in our currency since late last year led to huge increases in prices of BPW products, not only for the OE market but also in the Spares market. There seems to be improvement, but the result of this on imported costs will still take a while to materialize.

In the mean time we embarked on other ways to save cost. We can save on logistics cost by offering additional discount to parts distributors if they buy in bulk! This means that they have to order full box quantities or pallet loads to eliminate picking and packing in the factory. The (expected) boost in volume also means we can live with lower margins.

We trust these benefits will be passed on to our "end users", the transporters!
