## What's news?

The market penetration of trailer running gear from BPW in South Africa grew over many years to a strong 30%, and has maintained its position in spite of the weak trailer market experienced during the last two years. We believe that apart from being a quality product that sells itself, superior Product Support is the best answer to "how did you manage to achieve this?"

In BPW terms this means superior Application Engineering (Before sales service...) as well as decent parts availability and a well-developed maintenance training programme as cornerstones of Aftersales support.

In addition to this, we have just upgraded our ECO Plus Tool kit, comprising of a hubcap spanner, axle nut spanner (fit to use on both ECO Plus 1 and 3 axle models), maintenance manual and spares distributors leaflet. The toolkit is complementary to every trailer equipped with BPW ECO Plus running gear, and should you not receive this from your trailer builder, a call to the offices of BPW Axles in Johannesburg is more than welcome.

Remember our motto... **"we think transport"**!
