

What's News?.....From OE to PE...!

During the course of 2016, we announced that BPW Germany acquired PE Automotive GmbH, a well-known supplier of good quality replacement parts for the commercial truck and trailer market. At BPW we recognize that commercial vehicles have a "second life" after the warranty period has expired as well as in the second hand market. With this acquisition, the BPW Group is therefore in a position to not only service their customers with quality original spare parts, but also with top quality aftermarket parts as an alternative to the many "no-name" options available.

PE is a well-known brand in Europe, especially as far as truck parts are concerned. They however also have a whole array of trailer parts, which we can now offer to our local customers. Although the Trailerline brand has been available for some years now, it will slowly be replaced it with the PE brand. Products that are already available therefore include replacement air bags and shock absorbers with brake drums, boosters and various others to follow soon.

We are consequently looking forward to partnering with our customers for the full life-cycle of the vehicle!
