

What's News?

Automechanika is just around the corner and BPW AXLES are excited to be exhibiting at this year's show. We will be showcasing some exciting new technology for our running gear that is currently under development in Europe. Many of the ancillary products that we offer, like our BPW landing legs, VBG/Ringfeder couplings, Speedline wheels, HBN mudguards, toolboxes from Daken and wheel chocks from Lohken will also be on display. You will see that we are living up to our slogan "we think transport".

Product support is one of the cornerstones of our success in the local market, and a main element of this is spare parts availability. We therefore share our stand with our new daughter company, JMR Trailer Parts Group, who will demonstrate their ability to look after the well-being of your vehicles, not only during its warranty period, but also in its "second life".
