

What's News?

This month we have some product news to share! We are in the process of revising our Air suspension programme, which will firstly offer significant weight savings as well as a more streamlined range with less variety.

In the interim, we have introduced a clamped axle seat arrangement (as opposed to welded arrangement) in our Airlight2 air suspension range for axles with single wheel fitment. This will benefit all 3-axle semitrailers (Tankers, Box trailers, etc.) in on-road applications. The clamped arrangement is not new in BPW, since it has been in operation for many years in Europe. Testing in South Africa has shown that we can introduce the system with confidence in South Africa, and the benefit to the vehicle operator will be increased payload, with a saving of up to 40 kg per axle, as well as easier maintenance due to axle seats being clamped and not welded to the axle beam. The U-bolts are also changed, from M24 to a M22 bolt, which acts as a "stretch-bolt", therefore reducing the need or frequency of checking the torque settings.

Further rationalization between the SL range (heavy duty for side tippers) and the Airlight 2 is planned for the first quarter of 2018, but more about that in the next newsletter!

BPW GERMAN EVENING

BPW wish to thank all who attended the 2017 German Evening. It was a most enjoyable evening.

We invite you to view [Our Gallery](#)

BPW FACTORY CLOSURES:

15th December - 11th January 2018

BPW WILL BE CLOSED FROM:

21st December 2017

BPW WILL OPEN AGAIN ON:

3rd January 2018
